

ØAKITS

TRADITIONAL OAK FRAMES

Precision in every joint.

The CNC-Machined Oak Kit Collection

Premium timber construction, engineered for the ambitious DIYer.

THE OAKITS DIFFERENCE

Traditional Heritage Meets Modern Precision

At Oakits, we believe you shouldn't have to choose between the timeless beauty of traditional oak framing and the ease of modern construction methods. By pairing premium-grade European oak with state-of-the-art CNC machining, we deliver structural kits engineered to millimeter-perfect tolerances.

The result? A traditional, heritage-style oak frame that fits together seamlessly—removing the guesswork, reducing assembly time, and giving competent DIYers and local builders total confidence on site.

Inside Your Oakits Kit

- Precision CNC-Machined Frame: Every mortise, tenon, and joint cut perfectly to size.
- Structural Rafters & Fixings: Premium traditional oak pegs and required componentry.
- Custom Cladding: Any high-quality weatherboarding ordered to finish your structure.
- Component Numbering: Every single timber is clearly labeled to match your manual.
- Visual Assembly Guide: A clear, step-by-step instruction manual.

The Living Character of Premium European Oak

Unlike synthetic, mass-produced materials, premium European oak is a natural, living medium that evolves alongside your property.

- The Silver Patina: Over time, exposure to sunlight and rain will naturally weather the outer layer of the oak to a stunning, silver-grey patina—a hallmark of classic British timber architecture.
- Natural Checking: As the timber seasons in place, minor surface splits (known as checks) will develop. This adds unique, rustic character without affecting the immense structural integrity.

What You Will Need to Source Locally

- Groundworks, footings, and concrete foundations.
- Final roof coverings (e.g., slates, tiles, or cedar shingles).
- Insulation, internal boarding, and electrical/plumbing installations.
- Glazing, doors, and windows.

THE OUTDOOR LIVING COLLECTION

Al Fresco, Perfected.

Turn your garden into a premium lifestyle destination. Our outdoor living structures bring architectural beauty and structural permanence to your backyard.

The Oakits Pergola

Define your outdoor seating or dining area with a bold, minimalist oak pergola. Designed with clean, contemporary lines and precision-cut joints, it provides the perfect balance of dappled shade and open sky.

- Best for: Patio zoning, housing hot tubs, or creating a dedicated alfresco dining space.

Finding Your Perfect Fit

Our structures are engineered in a curated selection of set sizes designed to seamlessly complement various garden layouts.

We price our kits based on your specific configuration. To get a quote, measure your available footprint and email your requirements to info@oakits.co.uk.

THE OUTDOOR LIVING COLLECTION

Luxury Garden Entertainment

The Outdoor Kitchen Frame

Our specialized oak kitchen frames are engineered to house premium, built-in outdoor cooking setups. They shield your equipment and your chef from the elements while creating a luxury, resort-style entertainment experience right at home.

- Best for: Built-in outdoor kitchens, pizza ovens, and custom garden bar counters.

Finding Your Perfect Fit

Our structures are engineered in a curated selection of set sizes designed to seamlessly complement various garden layouts.

To get a quote, measure your available footprint and email your requirements to info@oakits.co.uk.

THE STRUCTURAL ADDITIONS

Space to Breathe. Value to Last.

The Garden Office - The Ultimate Work-From-Home Sanctuary

Step away from the distractions of the main house and into a dedicated, professional workspace. Our oak-framed garden office kits provide a beautiful, peaceful environment designed for ultimate focus and productivity.

- Year-Round Comfort: Precision CNC joints ensure an incredibly tight, draft-free frame shell, making it simple for your local trades to insulate, glaze, and heat.
- A Smart Investment: Far more substantial than a standard garden building, an oak-framed structural office adds a premium 'wow factor' that significantly boosts your property's footprint.

THE STRUCTURAL ADDITIONS

Breathtaking Home Extensions

The Oak Conservatory - Where Luxury Meets Light

Flood your home with natural light and bridge the gap between indoor luxury and outdoor beauty. A traditional oak-framed conservatory acts as a spectacular sunroom, dining area, or lounge.

- All-Weather Usability: Designed to support modern double or triple glazing systems, our conservatory frames allow you to enjoy sweeping garden views in total comfort, 365 days a year.

Finding Your Perfect Fit

Our structural additions are engineered in a curated selection of set sizes designed to seamlessly match various home profiles.

To get a quote, email your desired dimensions and details to info@oakits.co.uk.

THE VEHICLE & STORAGE SOLUTION

Curb Appeal, Redefined.

Protect your automotive investments with a structure that adds serious presence and value to your driveway. An Oakits carport replaces uninspiring brick or concrete garages with the warmth, strength, and timeless character of premium timber.

The Oakits Carport Range

- Scalable Configurations: Available in 1, 2, or 3-bay options to perfectly accommodate your daily driver, a multi-car collection, or additional garden machinery.
- The Open-Framed Aesthetic: Choose a fully open-sided design to showcase the stunning geometry of our CNC-machined braces and joints.
- The Enclosed Solution: Opt for a design enclosed with weatherboarding on three sides. The frame can be easily configured to allow for custom garage doors to be fitted locally.

Finding Your Perfect Fit

Our carports are engineered in a curated selection of set sizes. Because every driveway layout is unique, we price our kits based on your specific configuration.

To get a quote, choose your number of bays and style preference, then email your requirements to info@oakits.co.uk.

Frequently Asked Questions

Do I need planning permission?

Many of our standard-size structures fall under 'Permitted Development.' However, because rules vary based on your local council, we always recommend checking your local guidelines before starting foundations.

How is the kit delivered?

Your Oakits frame will arrive securely flat-packed via a dedicated delivery vehicle. We coordinate delivery with you in advance to ensure smooth access to your property.

NEXT STEPS

Bring Your Project to Life

Your Journey in 3 Simple Steps

1. Prepare	2. Assemble	3. Finish
Ensure foundations are complete. A level base is key. *Tip: We recommend a Genie material lift for assembly day.	Unpack numbered timbers. Follow the manual. Drive traditional oak pegs into the CNC joints.	Add chosen cladding, source preferred roofing, and bring in local trades for glass or insulation.

Ready to Begin? Here is What to Send Us:

To help our team provide the most accurate, rapid quote possible, drop a quick email to info@oakits.co.uk containing:

1. Your Chosen Style (e.g., 2-Bay Carport, Garden Office, or Pergola)
2. Your Rough Dimensions (Width and depth of the footprint you have available)
3. Your Configuration (Open-sided or enclosed weatherboard cladding)
4. A Photo of the Site (Optional smartphone picture to help our team visualize)

Contact us today to discuss your project.
