Frame Kits for the Home.**

Architectural Oak, Perfected by Precision.

At Oakits, our mission is simple: to redefine timber construction by merging the timeless beauty and strength of traditional solid oak with the surgical precision of modern technology. We provide homeowners with architecturally stunning oak structures that remove the guesswork from assembly. By moving away from heavy, rustic styles, we focus on delivering clean, professional, and elegant designs that seamlessly elevate modern outdoor living spaces. Whether you are looking for a tranquil garden office, a grand outdoor kitchen, or a striking pergola, an Oakits frame guarantees high-end, sustainable luxury that you can build with total confidence.

Precision-Engineered:

Manufactured using advanced CNC machinery for millimeter-perfect accuracy and a guaranteed 'perfect fit' every time.

Empowered DIY:

Designed specifically for the competent homeowner. We provide the master plans; you build the prestige space.

Sustainable Luxury:

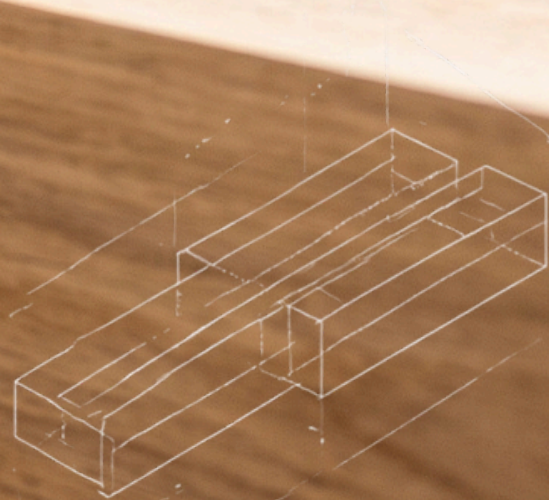

Crafted from premium solid oak, engineered to stand strong and look beautiful for a lifetime.

Why CNC Matters: The Engineered Advantage

Traditional oak framing is beautiful, but it can be inconsistent, time-consuming, and complex to install. We've changed the rules. Every Oakits timber frame is manufactured using advanced Computer Numerical Control (CNC) technology. This means every joint, cut, and angle is machined to absolute perfection, exactly as our engineers designed it in 3D.

THE RESULT FOR YOU:

- Flawless Assembly: Because we eliminate the inconsistencies of hand-cutting, every component fits seamlessly together.
- Rapid On-Site Installation: Precision engineering significantly reduces the time it takes to build your structure.
- Unmatched Strength: Exacting tolerances mean stronger joints and a more durable final building.
- Zero Gueswork: You aren't just buying timber; you are investing in a smart, reliable, engineered solution.

The Oakits Pergola

Frame the Outdoors.

Create a stunning, shaded retreat in your garden. The Oakits Pergola provides an elegant architectural centerpiece, perfect for al fresco dining, housing a hot tub, or simply creating a structured sanctuary to relax in. Clean lines and solid oak construction bring a touch of grandeur to any landscape.

AKITS

TRADITIONAL OAK FRAMES

Simple Ordering, Seamless Build.

Transforming your garden is easier than you think.
Our streamlined process is designed around you.

1

1. Choose Your Design —

Select your ideal structure (Pergola, Office, Garage, or Kitchen) and choose from our range of fixed sizes.

2

2. Select Your Extras —

Customize your frame to suit your vision. Add pitched softwood roofs, oak side cladding, gable cladding, or traditional sandstone saddles. Other options are available

3

3. Receive Your Kit —

Your precision-machined, ready-to-fit kit will be delivered directly to your door within 6 to 8 weeks.

4

4. Assemble with Confidence —

Follow our detailed master plans and experience the satisfaction of building a premium oak structure where every joint fits perfectly.

We offer flexible finance options to help you spread the cost of your new space. Ask us for details.

TRADITIONAL OAK FRAMES

Don't Just Take Our Word For It.

James Walker — Garden Office

"We were impressed by the level of precision in the Oakits kit. Every joint aligned perfectly, and made the assembly process far more straightforward than expected. The finished garden office feels solid, and extremely high quality."

Sarah Thompson — Pergola

"The quality of the oak and the structure was really high. Our joiner erected the pergola, and said it was very easy"

Mark Reynolds — Carport

"Plans were easy to follow and carport went up a breeze. I chipped in, but our builder erected it. Having seen how easy it was, I would do myself next time".
